

PURIS®

PURIS® Flow X

With world class expertise in plant-based extrusion technology, PURIS® FlowX has excellent flowability resulting in improved efficiency, less downtime, greater throughput, and more consistent production runs.

	MADE IN THE USA		MADE WITHOUT SOY	
	NON-GMO	VEGAN		KOSHER
	GLUTEN-FREE		KETO-FRIENDLY	

PURIS® FlowX

KETO

FEATURES

High protein purity (>80%), extremely bland taste and neutral color, ability to optimize particle size based on customer needs.

BENEFITS

PURIS® is known for the smoothest and smallest particle size pea protein in the market. The smaller particle size has been a bottle neck when it comes to material handling when pea protein is stored in silos or moved at high throughput due to material caking. PURIS® has designed FlowX to help customers to use pea protein at a faster rate by agglomerating the protein to improve hydration and reduce dustiness. There is a huge flexibility on changing the particle size to fit customer needs for density and flow.

APPLICATIONS

Cereal, snacks, crisps.
